- Flash Flood Watches in effect Wednesday afternoon through Friday morning for several burn scars across California including: Camp, Carr, Delta, Hirz, and the Mendocino Complex Fire burn scar areas
 - Those traveling in or along the areas along Interstate 5 and Hwy. 299 in the western portion of Shasta County, and along portions of Hwy. 70 and the Skyway in Butte County should be alert for possible road problems due to flooding, rock, and debris Flows.
- Wednesday
 - 0.50-1.00 inches of rain over the northern valleys
 - 1.00-2.00 inches of rain over the northern foothills
 - Heaviest rainfall rates late Wednesday afternoon and Wednesday night
- Thursday/Friday
 - 1.00-2.00 inches of rain over the northern valleys
 - 2.00-4.00 inches of rain over the northern foothills
 - Heaviest rainfall rates late Thursday night through early Friday afternoon

Southern California

- Minor debris flow concern for the Woolsey and Hill Fire burn scar areas Wednesday afternoon and Wednesday night
 - 0.30-0.60 inches of rain for the Woolsey and Hill burn areas with localized amounts up to 1.00 possible
 - The peak of the highest rainfall rates should occur between 2000 hours Wednesday evening through 0400 hours Thursday morning
 - No debris flow concerns for the Thomas Fire burn scar
 - No precipitation expected Thursday and Friday
- Winter Storm Watch in effect Wednesday afternoon through Friday morning for the Sierra across central and northern California. Generally 8-16 inches of snow is expected above 6000 feet, with up to 2 feet over the higher peaks.
- Strong winds Thursday night and Friday across northern California
 - Gusts 40-45 mph across the Sacramento valley
 - Gusts 50-70 mph along the eastern Sierra front
 - Gusts 70-100 mph across the Sierra ridges

Key Points

11/20/18 - 11/26/18

Tuesday

- Widespread poor air quality due to smoke
- Dry conditions continue statewide

Tuesday Night-Friday

- Periods of rain and mountain snow will impact most of the state. Southern California will see precipitation primarily Wednesday night and early Thursday, while northern and central California will see multiple rounds of precipitation through at least Friday night.
- Snow levels will be around 5000-6000 feet across central and northern CA and 6000-7000 feet across southern CA. Accumulating snowfall will make travel very difficult in some mountain locations.
- Moderate to heavy rainfall could bring a threat of mudslides and debris flows. This threat is highest in northern and central California, including the Camp, Carr, Delta, Hirz, and Medocino Complex fire burn scar areas. There is also a minor debris flow concern for the Woolsey and Hill burn scar areas.
- Strong winds are expected in northern California Thursday night and Friday, with 40-45 mph gusts in the Sacramento Valley, 50-70 mph gusts along the eastern Sierra Front, and 70-100 mph gusts across the Sierra Ridges.

Saturday-Monday

- Drier weather likely developing for the weekend.
- A weak Santa Ana event could bring offshore winds back to southern California Saturday night through Monday, creating elevated fire weather concerns.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

- Gusty Pre-Frontal S-SW Winds Tonight-Wednesday with Marginally Low Relative Humidity (RH) Shasta Valley/Weed area and East of the Cascade-Sierra Crest will Elevate Significant Fire Potential Locally for Several Hours
- Heavy precipitation at times in fire scar areas could create debris flows
- RH on mid and upper slopes still 10-25% with locally gusty NE winds this morning, ending around noon.
- Increasing S-SW winds, onshore flow, and higher RH this afternoon.
- S-SW gusts 35-45 mph this evening through Wednesday Shasta Valley/Weed area and east of the Cascade-Sierra crest. Significant Fire Potential will be elevated locally until rain develops - in the Weed area mid to late Wednesday morning and Shasta Valley/E of the crest early afternoon on Wednesday.
- Locally heavy rain or snow at higher elevations (mostly 5,500 feet +) is expected Wednesday and Wednesday evening and again late Thursday and Friday, ending early Saturday. Debris flow conditions expected in this year's fire scar areas.
- Dry with N-NE/Offshore winds Saturday through Monday. Some showers possible in the north Tuesday. Another round of heavier area-wide precipitation beginning Wednesday.

SOUTHERN CALIFORNIA

- A weak ridge of high pressure will remain over the West Coast today. A couple of Pacific troughs from the Gulf of Alaska will move into the West Coast Wednesday through Friday. The first trough will move inland Wednesday and Thursday and it will be stronger and dig further south than the second trough which will move inland Friday. A weak ridge of high pressure will build into California from the Pacific Ocean Saturday through early next week.
- There will be little change in temperature and humidity today.
- Maximum temperatures will remain near normal, with 50s to low 60s across the mountains and mid 60s to mid 70s in the valleys.
- Minimum humidity will be mainly in the teens away from the coastal areas.
- Winds will be light today.
- Temperatures will become 5 to 10 degrees below normal Wednesday through Friday.
- Showers will develop over the northern parts of Central California starting Wednesday morning and then spread south. Showers will not make it into Southern California until Wednesday night and Thursday morning. Showers will end across the region by noon Thursday.
- Most locations over Central California will receive between a quarter inch and an inch of rainfall and most locations over Southern California will receive between a tenth of an inch and a half inch of rainfall Wednesday and Thursday.
- Another round of showers will occur from a Monterey/Fresno County line northward Friday morning through Friday night with up to an additional half inch of rainfall.
- The snow level will be between 6,000 and 7,000 feet Wednesday through Friday.
- There will be south winds of 20 to 30 mph with gusts to 50 mph across the mountain ridges and desert passes Wednesday and then these winds will become westerly with the same speeds Thursday and Friday.
- A warming and drying trend will occur Saturday through early next week.
